Hi Jon,

The attached maps show buffers and possible housing structures around the priority mines in the San Mateo Creek basin.

This is email 1 of several emails containing maps supporting the request. There are 12 total maps.

Melody

Here is the list of mines. We are just interested in just the first nine mines. We would like maps of each one with 0.25, 0.5, and 1 mile radius around each of them with number of structures.

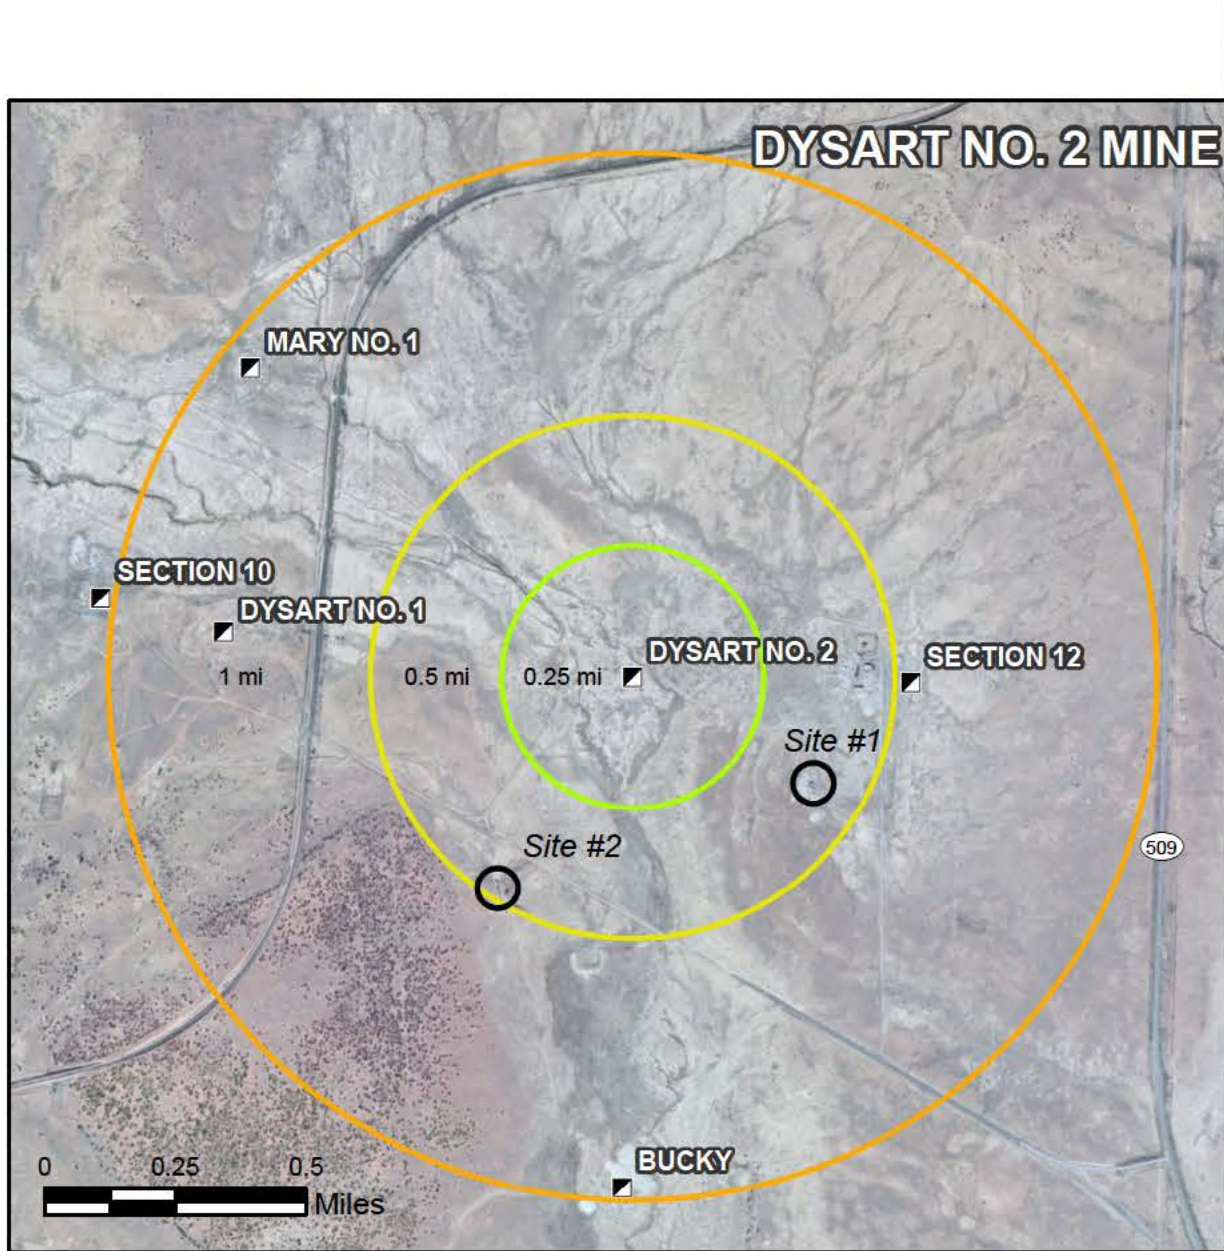

Thanks

Jon
